Summary

I am a developer with 4 years of experience mainly in backend development but also in frontend development, devops and a little bit of application development. I am in love with technology and I always try to learn something new. I am looking for a place where I can keep growing and where I could have the chance to lead a team or teach younger people at the proper time.

This are some of the things I feel more proud of:

- I am working for one of the most innovative companies in Spain and successfully managing several projects
- I can easily adapt to new projects or tasks
- I am helping a junior developer during his first experience, and he is being properly improving
- I created a technology, the Light Painter, which led me to win a local award for most disruptive technology award at a business accelerator (Santander Explorer Gran Canaria)

Experience

Open Ximdex Evolution

Sevilla / Spain

Content management with semantic data (startup)

Senior Backend Developer (100% remote)

2021 – now

Responsible for.....

- Managed 2 projects and one junior developer
- Successfully decreased the number of bugs on a project from $\frac{2}{3}$ per week to $\frac{1}{2}$ per month and optimized its performance by 60%
- Developed a service capable of extracting semantic data from texts, being able to aggregate external services.
- Introduced TDD and DevOps in managed projects
- Worked mainly with Python (Flask and Django) and PHP (Laravel), but also with other technologies such as Cloud, React, Docker and Nginx.

Open Canarias

Las Palmas de Gran Canaria / Spain

IT consulting company
